

FACTORIAL

Aim

To find the factorial of a given number using RAPTOR.

Algorithm

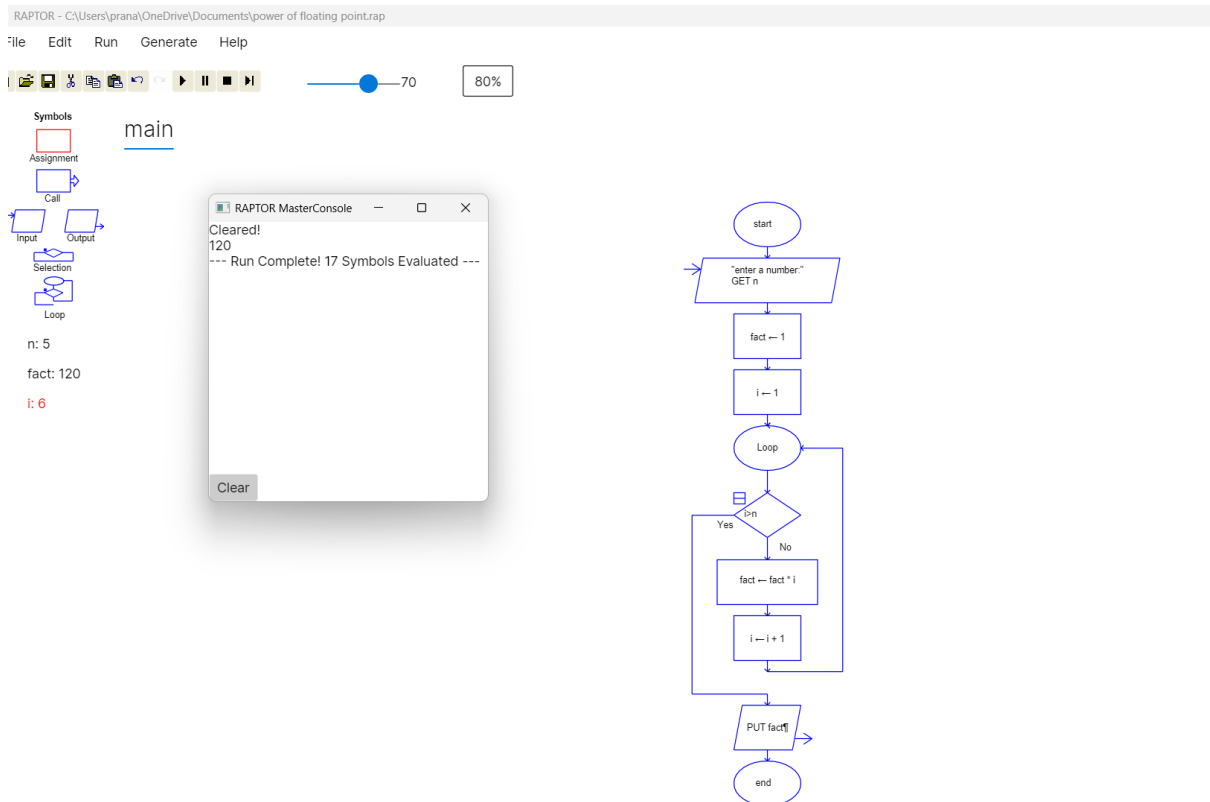

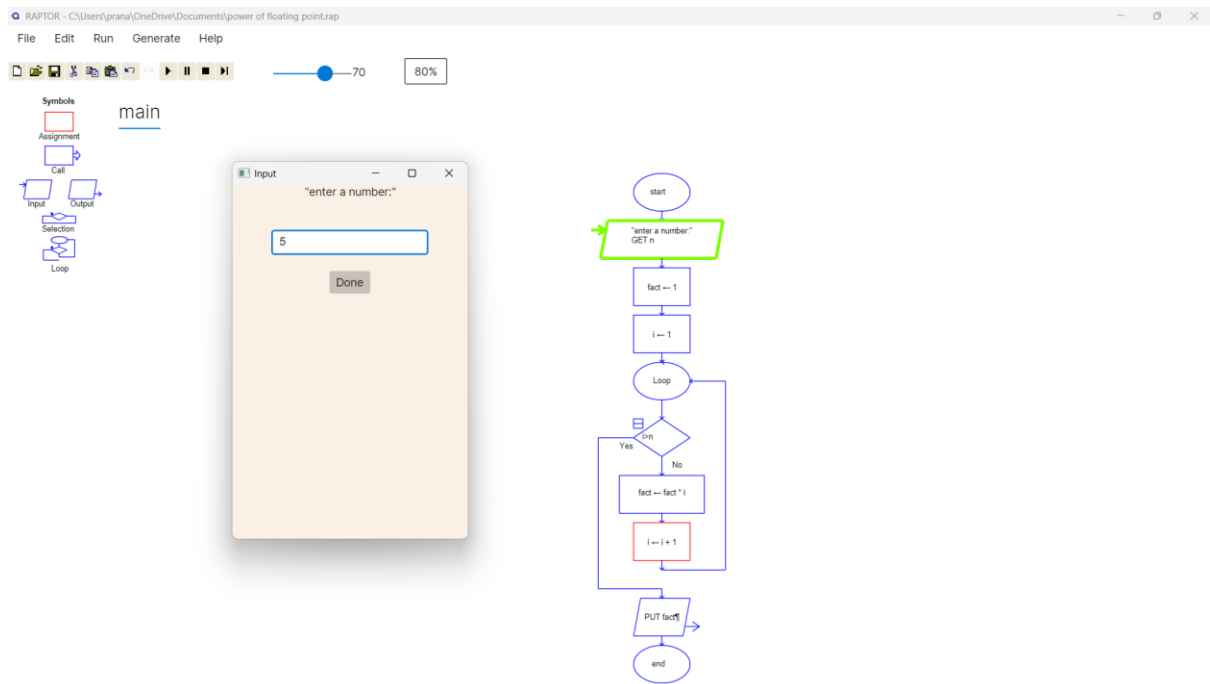

1. Start.
2. Read the value of n.
3. Initialize fact = 1 and i = 1.
4. Repeat until i > n:
 - fact = fact × i
 - i = i + 1
5. Display the value of fact.
6. Stop.

Sample Input

n = 5

Sample Output

Factorial = 120

Result

The factorial of the given number was calculated successfully using RAPTOR.
