

LEAST COMMON MULTIPLE

Aim

To find the Least Common Multiple (LCM) of two numbers using RAPTOR.

Algorithm

1. Start.
2. Read two numbers a and b.
3. Assign $x = a$ and $y = b$.
4. Repeat until $y = 0$:
 - remainder = $x \bmod y$
 - $x = y$
 - $y = \text{remainder}$
5. Calculate $\text{lcm} = (a \times b) / x$.
6. Display the value of lcm.
7. Stop.

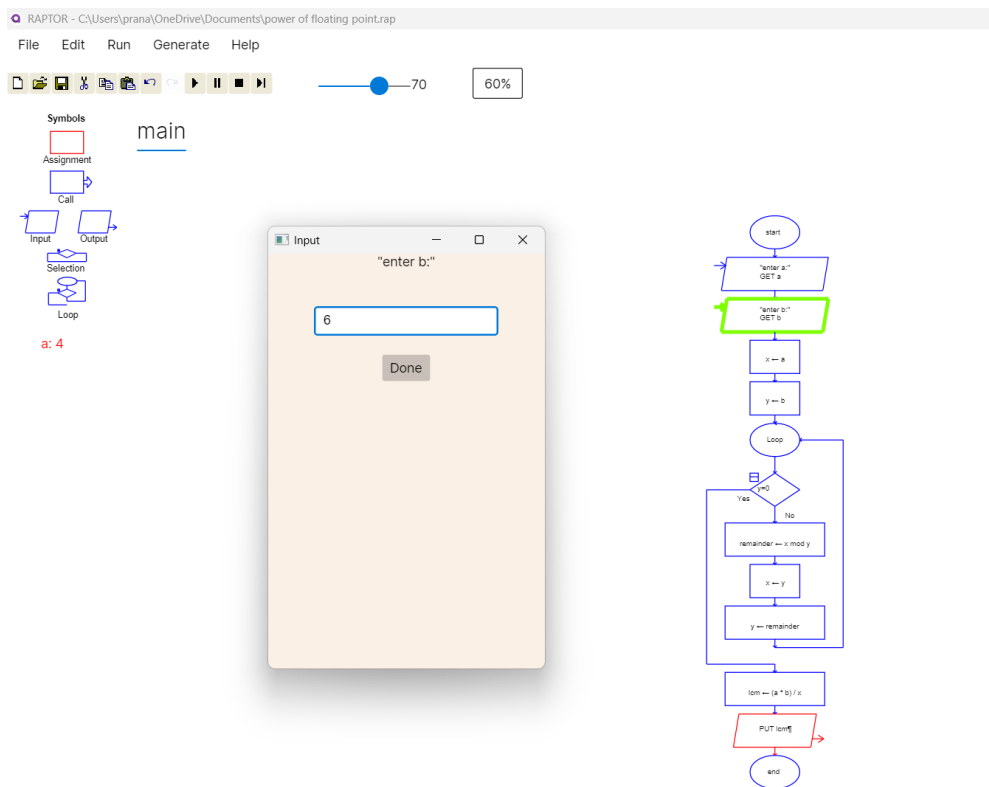

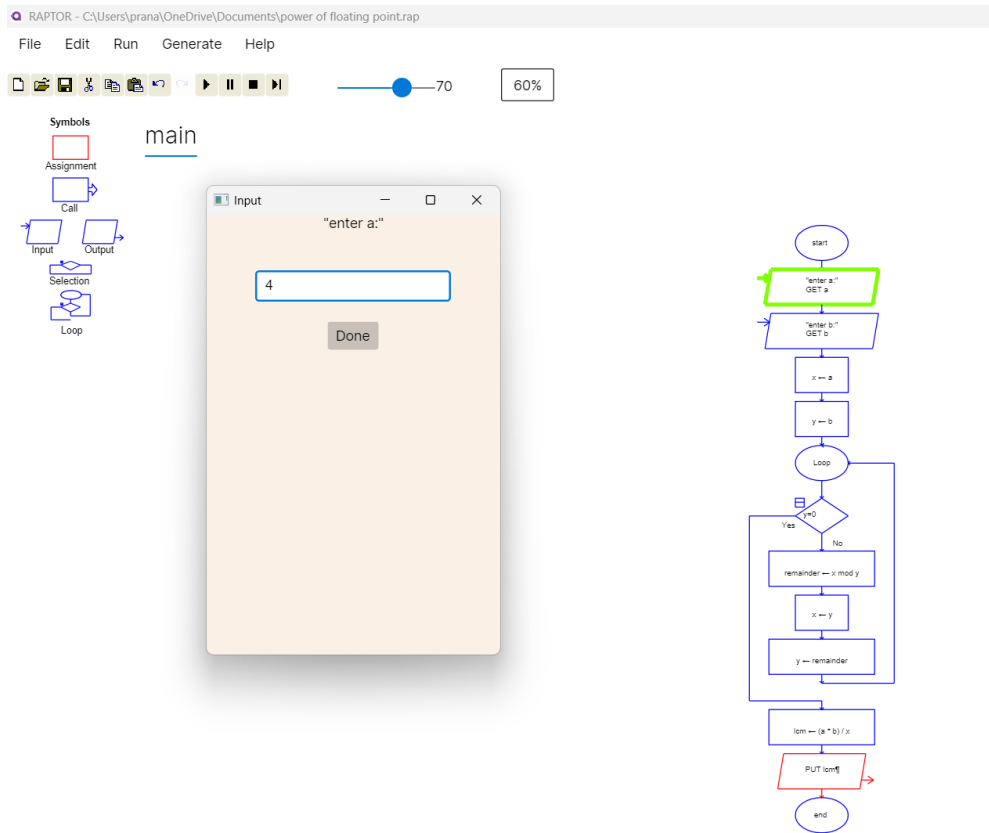

Sample Input

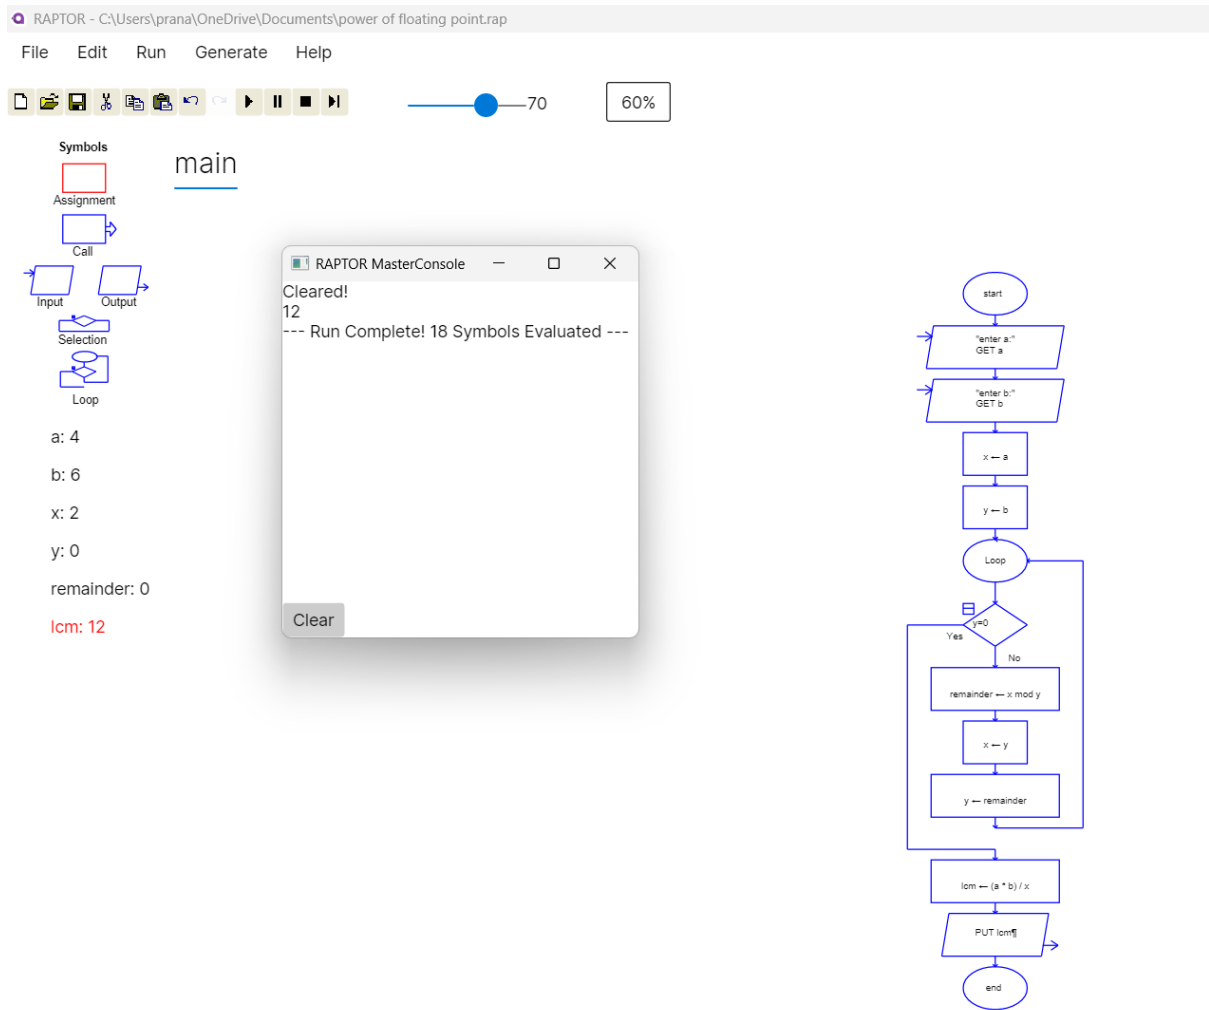

a = 4

b = 6

Sample Output

LCM = 12

Result

The Least Common Multiple (LCM) of the given two numbers was calculated successfully using RAPTOR.
