

PALINDROME OR NOT

Aim

To check whether a given number is a palindrome or not using RAPTOR.

Algorithm

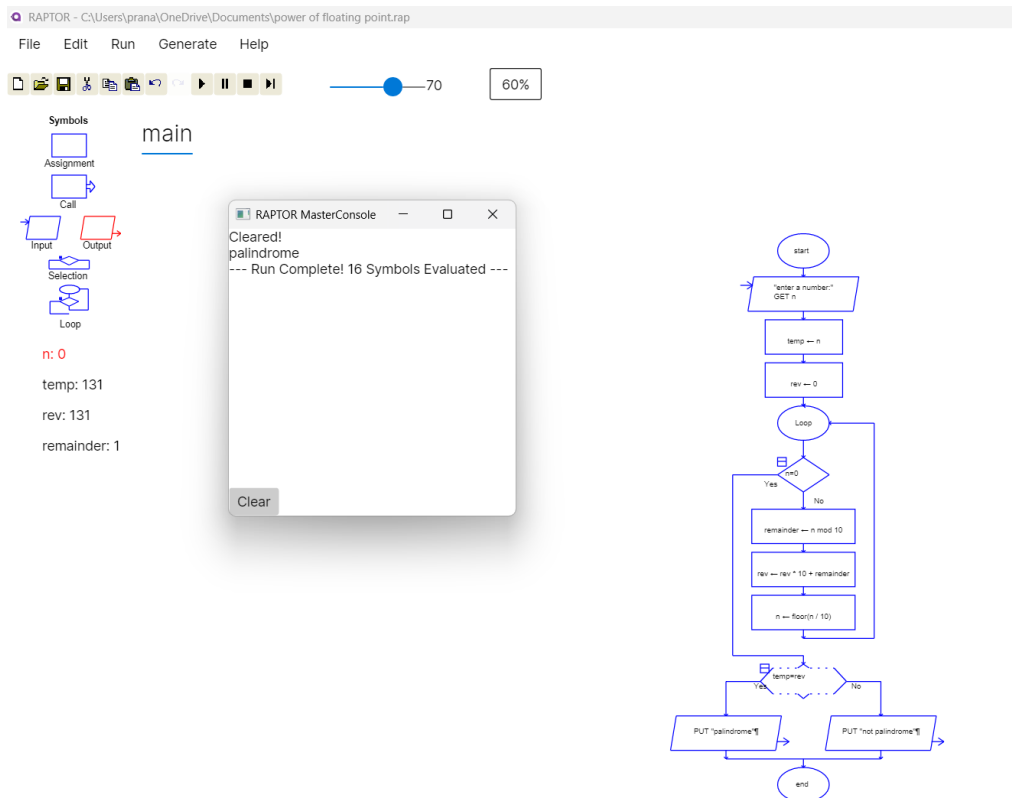

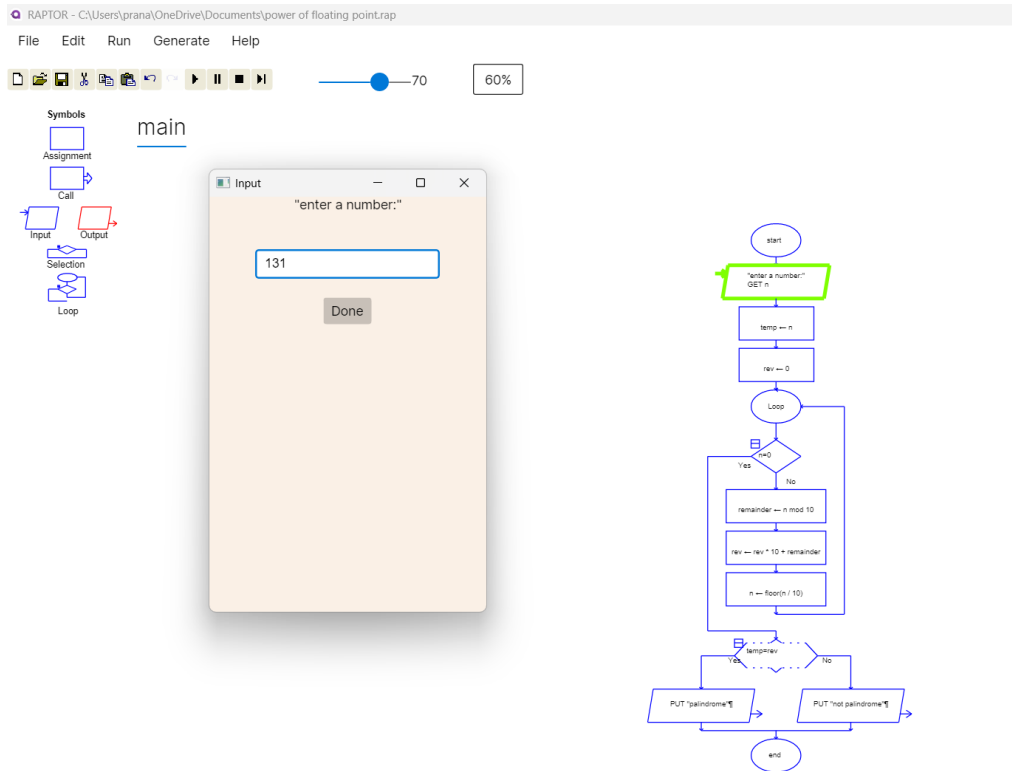

1. Start.
2. Read the value of n.
3. Store n in temp.
4. Initialize rev = 0.
5. Repeat until n = 0:
 - remainder = n mod 10
 - rev = rev × 10 + remainder
 - n = floor(n / 10)
6. Compare temp and rev.
7. If temp = rev, display "Palindrome"; otherwise, display "Not Palindrome".
8. Stop.

Sample Input

n = 131

Sample Output

Palindrome

Result

The given number was checked successfully, and it is a Palindrome.
