

QUOTIENT AND REMAINDER FOR FLOATING POINT

Aim

To find the quotient and remainder of two floating-point numbers using RAPTOR.

Algorithm

1. Start.
2. Read the floating-point values a and b.
3. Calculate $\text{quotient} = a / b$.
4. Calculate $\text{remainder} = a \bmod b$.
5. Display the quotient.
6. Display the remainder.
7. Stop.

Sample Input

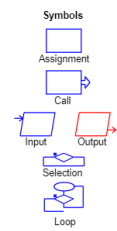

a = 10.5

b = 3

Sample Output

Quotient = 3.5

Remainder = 1.5

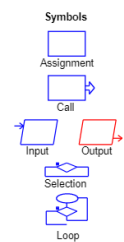

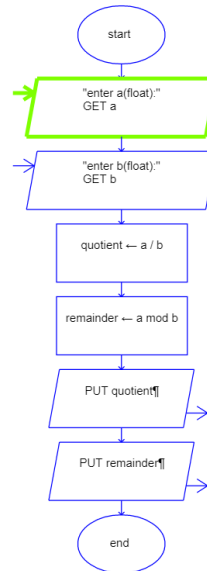

main

Input

enter a(float):

10.5

Done

a: 10.5

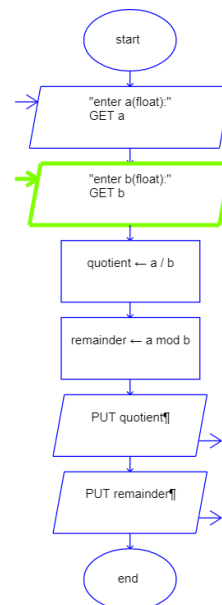

main

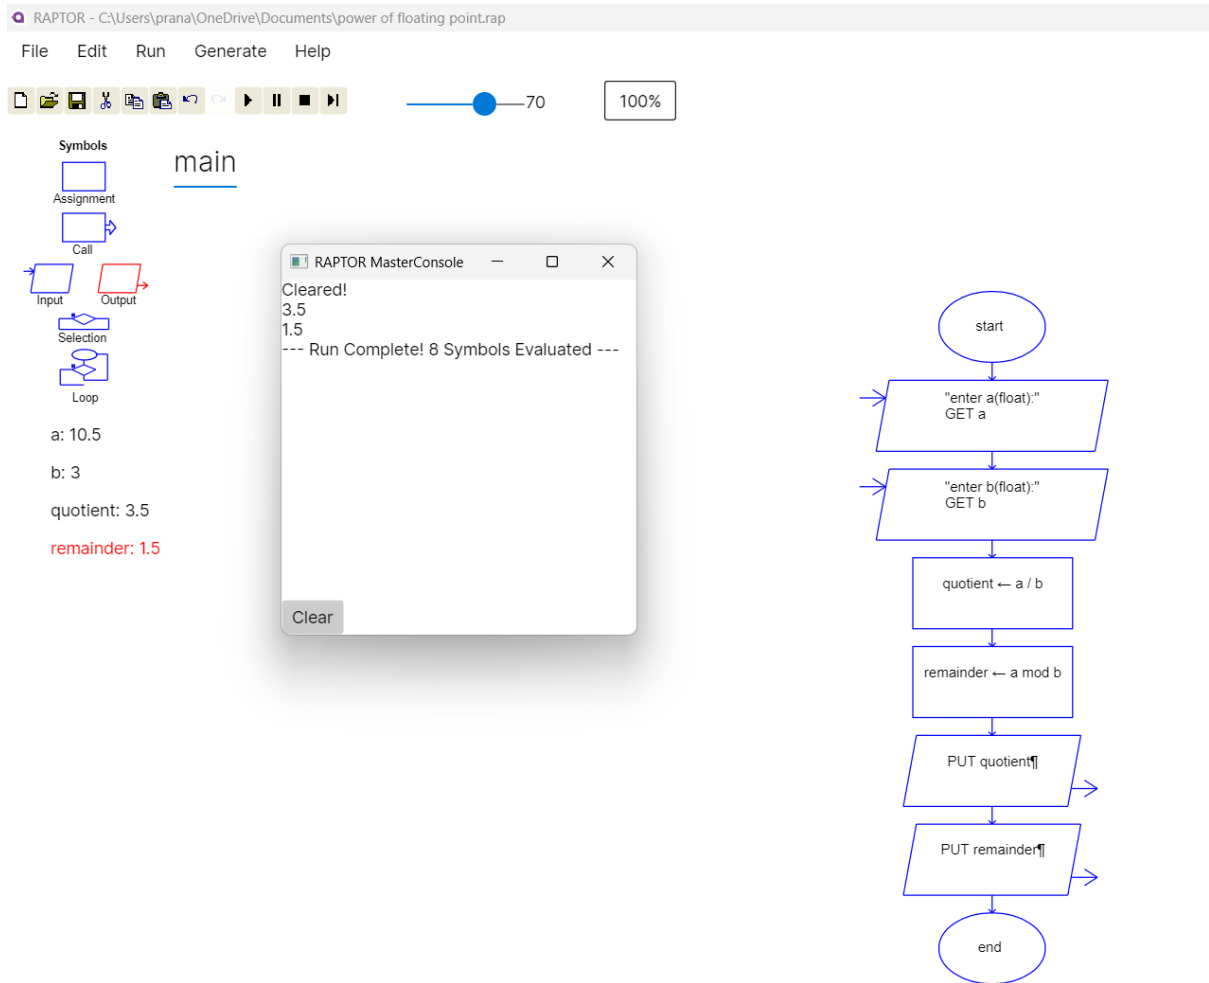

Input

enter b(float):

3

Done

Result

The quotient and remainder of the given floating-point numbers were calculated successfully using RAPTOR.
